Title: Myths Written in the Stars and Planets -- A Deep Dive into Greek Mythology

Modules referenced: one, two, four, & six

Note: This [link](#) is for a website I started programming; about halfway through, I decided to record the first half then program the rest but realized that I have too much material. I made a smaller copy of the website ([this is the one used in the video](#)). I highly recommend going through the [website](#)—just skimming it is good enough. The website itself has a lot more design and information than I couldn't cover in the video.
